Section: 213

Team: 11

Assignment: Lab12_Act1

Date: 8 December 2021

Hierarchy:

Description:

We chose to code the game Pig because we all enjoy games that involve dice, like Yahtzee. Probability plays a large part in the game Pig, so this contributed to our decision to pick this game because probability is a fascinating application of coding and has important implications in technology sectors such as data science and machine learning. We also enjoyed the risk-taking aspect that the game presents, being able to roll as many times as one wants but with the risk of losing all points in the round. Also, we think that pigs are cool.
